ABBREVIATIONS AND ACRONYMS

ACRAA	Association of Credit Rating Agencies in Asia
ADB	Asian Development Bank
ADTA	advisory technical assistance
AIDS	acquired immunodeficiency syndrome
DMC	developing member country
EVN	Electricity of Viet Nam
HIV	human immunodeficiency virus
IDP	internally displaced person
JSF	Japan Special Fund
OCO	Office of Cofinancing Operations, Asian Development Bank
OED	Operations Evaluation Department
OEM	operations evaluation mission
PP	project preparatory
TA	technical assistance
TCF	trillion cubic feet
TOR	terms of reference
TPAR	technical assistance performance audit report
WTO	World Trade Organization

NOTE

In this report, "\$" refers to US dollars.

I. BASIC FACTS AND KEY FEATURES

1. The Japan Special Fund (JSF), established in 1988, has grown into a significant fund at the Asian Development Bank (ADB). It finances a wide range of technical assistance (TA) activities in support of ADB's priority aid projects. Such activities support developing member countries (DMCs) of ADB (Appendix 1) in preparing a program of potential development projects that are technically feasible and economically viable, for subsequent financing. Some projects involve institutional strengthening, analytical studies of various types, or the formulation of national development plans and poverty reduction programs. Others build capacity to improve governance or accelerate human resource development. Regional TA grants are provided to a group of DMCs to support analytical

studies or development activities that benefit more than just one country. ADB's TA activities result in a range of knowledge products and services.

2. ADB administers the JSF through the Office of Cofinancing Operations (OCO). OCO processes TA proposals in batches, normally six times a year. It processes urgent proposals separately. The proposals undergo two stages of approval for fund commitment. After careful screening by OCO, they are sent to the Government of Japan for initial approval. The proposals that are approved after thorough review by the JSF authorities in Japan are further reviewed and cleared by ADB's interdepartmental staff review committee. Those that receive final approval are announced by OCO.

PROFILE

Background

- Established in March 1988
- Funded by the Government of Japan (GOJ)
- Administered by the Office of Cofinancing Operations of ADB

Uses of JSF Grants

- Preparing projects
 - Providing advice
 - Implementing projects
 - Supporting regional activities
-

TWO-STEP APPROVAL PROCESS

Informal

- Preliminary review
- Request for clarification
- GOJ final review
- Further request for clarification
- Receipt of informal approval

Formal

- Issuance of registration number
 - Receipt of formal approval
-

II. JAPAN SPECIAL FUND OPERATIONS IN 2004

A. Operational Highlights

3. As ADB continues to sharpen its strategies and policies to reduce poverty in the region and increase its development effectiveness, the JSF has continued to support its operations and particularly its TA program.

about 131 million people in an area of about 147,570 square kilometers. As high population density favors labor-intensive farming on fertile land and small-scale farming, agriculture continues to be a critical sector of the economy, generating about 30% of gross domestic product and employing about 70% of the labor force.

TECHNICAL ASSISTANCE APPROVALS (2004)

Between 1 January and 30 June 2004, ADB approved 4 technical assistance (TA) grants for JSF funding of \$2.6 million.

Between 1 July and 31 December 2004, ADB approved 67 TA grants for JSF funding of \$37.4 million.

1. Improving Rural Infrastructure in Bangladesh (Box 1)

4. Bangladesh is one of the world's most densely populated countries, with

5. Bangladesh is also one of the poorest countries in the world—about half of the population is poor. Economic development and poverty reduction are therefore overriding development priorities. With about 77% of the population and some 90% of the poor living in the rural areas, there is an acute need for employment-intensive activities in the nonfarm sector, effective education and health services, and better protection against natural disasters. Rural transport and market facilities must improve to meet these needs.

COMPARISON BETWEEN 2003 AND 2004 TECHNICAL ASSISTANCE APPROVALS

Period Covered	2003		2004	
	No. of Projects	\$'000	No. of Projects	\$'000
January–June	19	10,500.0	4	2,600.0
July–December	48	26,390.0	67	37,421.5
Total	67	36,890.0	71	40,021.5

Box 1: Second Rural Infrastructure Improvement Project, Bangladesh

The technical assistance (TA) addresses broader concerns of rural and social development besides road improvements. It also deals with specific problems that adversely affect the poor in especially disadvantaged parts of the Project, such as submersible access roads, which are subject to deep seasonal flooding. The TA is helping the Government draft a project proposal to augment rural livelihoods through improvements in rural infrastructure, reduce rural poverty, and strengthen local governance in Bangladesh. The ensuing Project will improve rural infrastructure in 23 districts in Rajshahi, Dhaka, and Chittagong divisions and increase economic opportunities for the rural poor by improving rural infrastructure. The Project will (i) build stakeholder capacity and strengthen local governance; (ii) upgrade rural infrastructure; (iii) provide income-generating activities for the rural poor; and (v) provide institutional support for effective management.

Source: ADB. 2004. *Technical Assistance to the People's Republic of Bangladesh for Preparing the Second Rural Infrastructure Improvement Project*. Manila (TA 4516-BAN, \$400,000, approved on 20 December 2004).

2. Improving Access to Basic Social Infrastructure in Azerbaijan (Box 2)

6. Despite the relatively rapid growth in gross domestic product per capita, many people in Azerbaijan have no access to adequate social infrastructure services such as drinking water and sanitation, education, and health care. These services have significantly deteriorated since independence in 1991. At the same

time, demand for these services is increasing, particularly in the urban areas. Internally displaced persons (IDPs) are among the most vulnerable segments of the population. About 382,000 IDPs are reported to live in temporary shelters with no access to basic services. Other vulnerable groups that also lack access to adequate social infrastructure are the unemployed, female-headed households, pensioners, and the disabled.

Box 2: Social Infrastructure for Internally Displaced Persons and Vulnerable Population Project, Azerbaijan

The Project is aimed at improving access to basic social infrastructure for vulnerable segments of the population, including internally displaced persons (IDPs), while at the same time building the capacity of local government and community groups to identify priorities, make strategic plans, and improve the quality and coverage of service. The Project involves (i) subproject investments in new, rehabilitated, or upgraded housing or municipal infrastructure (e.g., public schools, water supply, and sanitation) for IDPs; (ii) support for local initiatives to improve social infrastructure services, using a community-driven development approach; (iii) capacity building for municipalities, local executive committees, community groups, and other project partners; and (iv) support for project management.

Source: ADB. 2004. *Technical Assistance to the Republic of Azerbaijan for Preparing the Social Infrastructure for Internally Displaced Persons and Vulnerable Population Project*. Manila (TA 4478-AZE, \$500,000, approved on 14 December 2004).

3. Preparing the Gas Transportation Project Through Public-Private Partnership in Indonesia (Box 3)

7. Among Southeast Asian countries, Indonesia is particularly well endowed with natural gas resources. It has about 177 trillion cubic feet (TCF) in current reserves, half of those proven. At the current production rate (around 3 TCF per year over the last 7 years), the reserves are good for well over 50 years. About 70% of the gas produced is exported as liquefied natural gas and through

pipelines, and the rest is consumed by the country. While some major reserves are far from the main consumption centers, significant reserves in South Sumatra are less than 600 kilometers from the Jakarta area. Government reports indicate some 7 TCF of remaining reserves in West Java alone, although these have not been developed. This potential if realized, coupled with the South Sumatra reserves, should secure the gas supply to the Java market over the medium term.

Box 3: Gas Transportation Project Through Public–Private Partnership, Indonesia

In this two-part project, the scope of work in part A consists of assisting the Government of Indonesia in selecting an optimum gas transportation scheme for Java. The choice will be based on the findings of the gas sector development plan prepared with ADB assistance and the gas pricing and utilization study being done with the help of the World Bank. The potential for increasing the share of gas in the country's energy mix, using gas pricing and other appropriate policies, will be evaluated.

Subject to the conclusions of part A, detailed studies will be done in part B to formulate and implement the gas transportation project identified in part A. The gas market will be assessed, front-end engineering design will be carried out, environmental and social impact will be determined, and an “optimum” project structure and financing plan based on public-private partnership will be prepared.

Source: ADB. 2004. *Technical Assistance to the Republic of Indonesia for Preparing the Gas Transportation Project Through Public–Private Partnership*. Manila (TA 4360-INO, \$910,000, approved on 20 July 2004).

4. Preparing a Renewable Energy Development Project in Pakistan (Box 4)

8. Pakistan is a net importer of energy. Each year it imports \$3 billion worth of oil, or about 30% of total import value, for its energy needs. Oil imports place a heavy foreign exchange burden on the Government, particularly with the recent increases and continuous fluctuation in oil prices. Most of the oil is used to generate electricity. More than

70% of Pakistan's electricity comes from thermal sources, a little less than 30% is hydroelectric power, and less than 1% comes from renewable and other sources. Even with all its energy imports, Pakistan still faces a 20% shortage in power. To address this shortage and promote its decentralization policy, the Government of Pakistan has delegated authority to the provinces to develop up to 50 megawatts of generating capacity for their energy needs. Installing small-scale power generation technologies close to the load

being served (distributed generation) has significant advantages. It will not only help meet the power shortage but also

ensure more reliable and better-quality supply of power.

Box 4: Renewable Energy Development Project, Pakistan

The technical assistance is aimed at evaluating ways of developing renewable sources of energy, primarily wind and solar energy and thermal heating systems for domestic and industrial use, as well as bagasse cogeneration of power and possibly biomass energy.

Source: ADB. 2004. *Technical Assistance to the Islamic Republic of Pakistan for Preparing the Renewable Energy Development Project*. Manila (TA 4425-PAK, \$550,000, approved on 5 November 2004).

B. Recognition of Japan Special Fund Assistance

9. JSF grant recipients recognize the significance of JSF assistance. The Government of Japan, for its part, appreciates activities such as TA signing ceremonies, speeches, press releases, and printed materials that boost visibility for JSF financing, and encourages recipients to support efforts at greater visibility.

10. Two high officials from the Government of Viet Nam and ADB's country director participated in the signing ceremony at the State Bank of Viet Nam for the JSF-funded project

preparatory TA grant titled Rural Infrastructure for Sustainable Livelihood Improvement in the Central Region. The first secretary and head of the economic section of the Embassy of Japan witnessed the signing of the TA agreement. The TA will support improvements in rural infrastructure in the provinces of Ha Tinh, Nghe An, Quang Binh, Quang Nam, Quang Tri, and Thanh Hoa in the Central Region (Box 5) and thus help reduce rural poverty in Viet Nam.¹

¹ ADB. 2004. *Technical Assistance to the Socialist Republic of Viet Nam for Preparing the Rural Infrastructure for Sustainable Livelihood Improvement in Central Region Project*. Manila (TA 4440-VIE, \$800,000, approved on 19 November 2004).

11. In a speech at a 3-day high-level meeting on key Doha Round issues in Osaka, Japan, the chief economist of ADB's Economics and Research Department expressed deep appreciation for the "keen interest" shown by the local authorities in hosting high-level meetings on World Trade Organization issues and thanked the Government of Japan for its financial support, through the Japan Special Fund (Box 6).

12. A second best-practices dialogue was convened at ADB headquarters under

the third phase of the JSF-funded regional TA grant that is aimed at strengthening the institutional and technical capabilities of Asian domestic credit rating agencies in capital market development. The 1-day event, organized by ADB's Office of Regional Economic Integration, was attended by chief executive officers of domestic credit rating agencies in the region that are members of the Association of Credit Rating Agencies in Asia (Box 7).

JSF VISIBILITY

The Government of Japan (GOJ) appreciates the visibility generated by technical assistance (TA) signing ceremonies, which promotes public awareness of Japan Special Fund (JSF)-financed TAs and will help make the case for continuing support for JSF.

Based on experience during well-attended signing ceremonies, in particular, for TA projects for the Philippines, GOJ offers a few suggestions for further strengthening JSF visibility during signing ceremonies to be attended by local Japanese Embassy officials. Activities that will increase the visibility of this fund are the following:

Press Release: The attendance of the GOJ official is clearly mentioned in press releases. In this connection, the ten-day notice period is required for informing Tokyo, for the preparation of appropriate press releases, and other logistic and physical arrangements.

Speech: The signing ceremonies should be an opportunity for the GOJ representative to deliver a goodwill message.

Physical Arrangement: Appropriate seating arrangement for the representative of GOJ, the donor, should be provided.

Printed material: It is suggested to make appropriate but simple mention of the assistance from GOJ, through the JSF in the printed materials, for example, handouts, brochures, banners, etc. to be used and distributed in workshop and seminars.

Newsletter: Short articles regarding these activities may also be incorporated in the Resident Mission Newsletter. Site visits by GOJ/JSF authorities to specific TA projects may also be featured (see <http://cofinancing.asiandevbank.org/>).

Box 5: Rural Infrastructure for Sustainable Livelihood Improvement
in the Central Region Project, Viet Nam

ADB NewsRelease

VIET NAM RESIDENT MISSION, ASIAN DEVELOPMENT BANK

Agreement Signed for Grant to Develop Rural Infrastructure in Viet Nam's Deprived Central Region (4440-VIE)

HANOI, VIET NAM – ADB and the Government of Viet Nam today signed an agreement for a project preparatory technical assistance grant of US\$800,000 to develop a rural infrastructure project to improve livelihoods in remote deprived areas of the country's Central Region.

The grant, approved on 19 November 2004, is from ADB's Japan Special Fund, financed by the Government of Japan.

Signing on behalf of ADB at the ceremony, held this morning at the State Bank of Viet Nam, was Bradford Philips, Country Director, Viet Nam Resident Mission. Tran Minh Tuan, Deputy Governor of the State Bank of Viet Nam, and Pham Hong Giang, Vice Minister of Agriculture and Rural Development, signed on behalf of the Government. Also present at the signing ceremony was Mr. Yasukata Fukahori, First Secretary and Head of Economic Section, from the Japanese Embassy.

Box 6: Capacity Building of Developing Member Countries on Selected World Trade Organization and Doha Development Agenda Issues Project, Regional

**Today's
Event**

High-level meeting: WTO key Doha Round issues Osaka

The meeting aims to monitor the developments of the ongoing Doha Development Agenda, evaluate implications to DMCs of the Hong Kong Ministerial Meeting in December and enable DMCs to apply policy options learned. Senior trade officials from 27 DMCs will attend. Chief Economist Ifzal Ali will give the opening remarks. *Teruo Ujiie, 5904*

The high-level meeting on World Trade Organization (WTO) key Doha Round issues—the first activity under 6220-RETA approved on 21 December 2004: Capacity Building of Selected Developing Member Countries on WTO and Doha Development Agenda Issues, \$400,000 grant from Japan Special Fund, funded by the Government of Japan—was held in Osaka, Japan.

Among the resource persons were former US Trade Representative Carla Hills, Osaka Governor Fusae Ohta, and Chief Economist Ifzal Ali. Senior trade officials who attended the meeting included Azerbaijan Deputy Minister of Foreign Affairs Mamed Kuliyyev; Indian Undersecretary of the Department of Economic Affairs, Ministry of Finance, Ram Mohan; Nepal Joint Secretary, Ministry of Industry, Commerce and Supplies, Naindra Prasad Upadhaya; and Pakistan Joint Secretary for WTO, Ministry of Commerce, Qasim Mohammad Niaz.

Box 7: Association of Credit Rating Agencies in Asia (ACRAA) Best Practices Dialogue

The second best-practices dialogue was organized under 6191-RETA (Capacity Building of Selected Credit Rating Agencies in Asia, Phase III) approved on 11 October 2004 and funded with a \$300,000 grant from the Japan Special Fund. The following topics were discussed:

1. Role of Rating Agencies under Basel II: Issues in Harmonization and Mapping with Global Agencies
2. Cross-Sector Consistency of Ratings: How to Manage and Measure
3. "Through-the-Cycle" Rating: Striking a Balance Between Volatile Ratings and Insensitive/Inaccurate Ratings

Among the dialogue participants in the photo are Pranab Kumar Choudhury, ACRAA vice chairman and managing director of ICRA Limited, India (row 1, first from right); Suresh Menon, ACRAA Training Committee chairman and executive director, Rating Agency Malaysia Berhad (row 3, fourth from left); Rajagopalan Ravimohan, ACRAA Best Practices Dialogue chairman, and managing director and chief executive officer, CRISIL Limited, India (row 3, third from right); and Santiago F. Dumlaog Jr. (row 2, seventh from left), ACRAA secretary-general and president of Philippine Rating Services Corporation.

ADB participants in the photo are Pradumna B. Rana, senior director, Office of Regional Economic Integration (row 2, fifth from left); and Jiro Tsunoda, senior financial sector specialist (coordinator of 6191-RETA) (row 3, fifth from left).

C. Evaluation of Technical Assistance Projects Financed by the Japan Special Fund

13. In 2004, ADB's Operations Evaluation Department (OED) prepared two technical assistance performance audit reports (TPARs) on five advisory technical assistance projects (ADTAs) for the institutional strengthening of the power sector in Viet Nam and six ADTAs for fiscal management and tax administration in India. Four of the power sector ADTAs in Viet Nam (2345-VIE, 2346-VIE, 2888-VIE, and 2897-VIE)¹ were financed from the JSF, as were two of the ADTAs in India (2432-IND and 2943-IND).²

¹ ADB. 1995. *Technical Assistance to the Socialist Republic of Viet Nam for the Improvement of Financial and Accounting Systems of the Power Companies Project*. Manila (TA 2345-VIE, \$1,200,000, approved on 8 June 1995); ADB. 1995. *Technical Assistance to the Socialist Republic of Viet Nam for the Training in Distribution Planning Project*, Manila (TA 2346-VIE, \$247,000, approved on 8 June 1995); ADB. 1997. *Technical Assistance to the Socialist Republic of Viet Nam for the Improvement of the Power Sector Regulatory Framework Project*. Manila (TA 2888-VIE, \$800,000, approved on 7 October 1997); ADB. 1997. *Technical Assistance to the Socialist Republic of Viet Nam for the Commercialization of Power Companies Project*. Manila (TA 2897-VIE, \$900,000, approved on 20 October 1997).

² ADB. 1995. *Technical Assistance to India for the Capacity Building of Income Tax Administration Project*. Manila (TA 2432-IND, \$550,000, approved on 26 October 1995); ADB. 1997. *Technical Assistance to India for the Support for the Government of Madhya Pradesh Public Finance Reform and Institutional Strengthening*

14. TA 2345-VIE was consistent with the policy direction for the power sector that the Government of Viet Nam and ADB had agreed upon at approval. However, it soon became apparent that Electricity of Viet Nam (EVN) was less committed to the policy changes than expected. While internal management systems have been strengthened somewhat, many recommendations of the TA have not been implemented.

15. TA 2346-VIE was planned well and implemented successfully. Training participants surveyed said that the course was well designed and delivered. The use of real planning projects in the training was effective, and increased the useful output from the TA. However, the single software license provided to Power Company No.1 and Power Company Hanoi was probably inadequate for the effective follow-up of the concepts and techniques taught during the course. While the Operations Evaluation Mission (OEM) was told that the software was still in use, its effectiveness was unclear.

16. At TA approval in October 1997, the draft electricity law was expected to be

Project. Manila (TA 2943-IND, \$780,000, approved on 15 December 1997).

submitted to the National Assembly in 1998 and formally adopted in late 1998 or early 1999. Thus, TA 2888-VIE was considered timely because supporting regulations needed to be available at least in draft form when the National Assembly considered the law. However, the time frame of the TA was overly optimistic. This, combined with other factors, required a reduction in the scope of work. Furthermore, the consultant could not get the stakeholders to agree to establish an electricity regulatory framework. The TA only prepared a regulation on tariff reform that formed the basis for a similar draft regulation that was submitted to the National Assembly in support of the draft electricity law.

17. TA 2897-VIE was formulated to assist EVN in implementing the recommendations of TA 2345-VIE. While the terms of reference (TOR) appear to have been designed carefully to take into account the regulatory constraints on the operation of EVN, the consultant did not appreciate this fully. Some recommendations were useful and were implemented, but other parts of the consultant's report did not address the TOR directly and, as a result, could not be implemented.

18. The four JSF-financed TAs evaluated in 2004 supported ADB's policy dialogue with the Government of Viet Nam to strengthen and reform the power sector and thus minimize the risk that economic development would suffer from the absence of an adequate and cost-efficient electricity supply. The OEM rated the four TAs partly successful because the TOR (i) lacked clarity, (ii) had become less relevant by the time the TA started, and (iii) focused unduly on addressing constraints on EVN performance to the detriment of optimizing performance within the organizational structure.³

19. Both TAs in India were rated successful. TA 2432-IND on income tax administration established training centers that have built capacity and, more generally, enabled more systematic computerization and networking among income tax offices all over the country. TA 2943-IND in Madhya Pradesh triggered the computerization of budget and treasury functions, while also preparing the tax department for the introduction of value-added tax.⁴

³ ADB. 2004. *Technical Assistance Performance Audit Report on Advisory Technical Assistance for Power Sector Institutional Strengthening in Viet Nam*. Manila.

⁴ ADB. 2004. *Technical Assistance Performance Audit Report on Selected Technical Assistance*

20. TPARs are generally based on ADB-wide priorities, and on relevant and appropriate lessons for the design and implementation of TAs in a particular sector or country. TPARs assess implementation performance, evaluate the achievement and impact of the TA, and draw lessons from the experience to improve TA activities. Post-evaluated projects, programs, and TA operations are classified as highly successful, successful, partly successful, or unsuccessful. ADB's TPARs since 1995 are available online at OED's Web site at <http://www.adb.org/evaluation/reports.asp>.

D. Contributions from the Government of Japan

21. In 2004, the Government of Japan provided ¥2.7 billion, all in regular contributions, as its 16th annual contribution to the JSF. Since March 1988, Japan has contributed to the JSF ¥101.9 billion (about \$876.9 million), comprising ¥83.8 billion in regular contributions and ¥18.1 billion in supplementary contributions.

E. Balance of Contributions Available for New Commitments

22. Of the total contribution to the JSF as of 31 December 2004, \$808.4 million was used to fund TAs. As of 31 December 2004, TAs worth \$27.4 million had been approved by both the Government of Japan and ADB, but had not yet taken effect, and other TAs worth \$3.6 million had been approved by the Government of Japan and were being processed by ADB. At the end of 2004, the uncommitted balance available for new commitments was \$118.2 million.

F. Review of Activities

1. Total Approvals for the Year and Cumulative Totals

23. In 2004, the JSF provided about \$40.0 million for 71 country-specific and regional TAs (Appendix 2), compared with \$36.9 million in 2003. The 2004 JSF total represented about 20% of ADB's TA program that year. From 1988 to the end of 2004, \$891.6 million was committed under the JSF to finance 1,473 TAs (Appendix 3).

2. Total Approvals by Country

24. In 2004, the JSF provided \$32.3 million to finance 56 new country-specific TAs in 24 countries. Since its establishment, the JSF has supported 34 countries (Appendix 4).

3. Nature and Type of Technical Assistance Projects Supported

25. In support of ADB's goal of reducing poverty in the region, the JSF has made untied funds available for advisory, project preparatory, and regional TAs.

26. In 2004, \$14.6 million went to 28 advisory TAs, bringing the total since 1988 to \$411.9 million for 671 advisory TAs.

27. The JSF also provided \$17.7 million for 28 project preparatory TAs in 2004, for a total of \$374.0 million for 618 project preparatory TAs since 1988.

28. Fifteen regional TAs received \$7.8 million from the JSF in 2004. From 1988 to 2004, \$105.4 million was approved for 184 regional TAs.

4. Approvals by Sector

29. The JSF supports a wide range of sectors and subsectors (Appendix 5). In 2004, the agriculture and natural resources sector (16.1 % of total funding with 12 grants worth \$6.4 million) and the water supply, sanitation, and waste management infrastructure sector (15.5 % of total funding with 10 grants worth \$6.2 million) received the most support.

G. Financial Statements

30. Since 1997, explanatory notes to the JSF financial statements have been included in ADB's annual reports to show the actual and realistic JSF balances that are uncommitted to date and are available for the financing of proposed new TAs (Appendix 6).

H. Home Page

31. This report, as well as other current data, is available through the JSF Web site (<http://www.adb.org/jsf>). The Japanese translation will be available through the Web site of ADB's Japanese Representative Office (<http://www.adb.org/JRO/>).

SECTOR DISTRIBUTION OF JAPAN SPECIAL FUND GRANTS

FINANCIAL STATEMENTS

REPORT OF INDEPENDENT AUDITORS

Asian Development Bank

In our opinion, the accompanying statements of financial position and the related statements of activities and changes in net assets and cash flows present fairly, in all material respects, in terms of United States dollars, the financial position of the Asian Development Bank—Japan Special Fund at 31 December 2004 and 2003, and the results of its activities and changes in net assets and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the management of the Asian Development Bank; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Price Waterhouse Coopers LLP

Detroit, Michigan

ASIAN DEVELOPMENT BANK—JAPAN SPECIAL FUND

NOTES TO FINANCIAL STATEMENTS

31 December 2004 and 2003

NOTE A—NATURE OF OPERATIONS

The Japan Special Fund (JSF) was established in March 1988 when Japan and the Asian Development Bank (ADB) entered into a financial arrangement whereby Japan agreed to make an initial contribution and ADB became the administrator. The purpose of JSF is to help developing member countries (DMCs) of ADB restructure their economies and broaden the scope of opportunities for new investments, thereby assisting the recycling of funds to DMCs of ADB. While JSF resources are used mainly to finance technical assistance (TA) operations, these resources may also be used for equity investment operations in ADB's DMCs. Under the agreement between ADB and Japan, ADB may invest the proceeds of JSF pending disbursement.

In March 1999, the Board approved the acceptance and administration by ADB of the Asian Currency Crisis Support Facility (ACCSF) to assist Asian currency crisis-affected member countries (CAMCs). Funded by Japan, ACCSF was established within JSF to assist in the economic recovery of CAMCs through interest payment assistance (IPA) grants, TA grants, and guarantees. With the general fulfillment of the purpose of the facility, Japan and ADB agreed to terminate the ACCSF on 22 March 2002. An amount of \$90 million in the ACCSF account, upon request of Japan, was transferred to the Japan Fund for Poverty Reduction (JFPR). JFPR, established by Japan in May 2000 supporting innovative poverty reduction and related social development activities, is one of the trust funds managed by ADB. The ACCSF account is to be kept open until the completion of all TA disbursements and the settlement of all administrative expenses.

NOTE B—SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Presentation of the Financial Statements

The financial statements of JSF are presented on the basis of unrestricted and temporarily restricted net assets. ACCSF funds are separately reported in the financial statements.

JSF reports the contributions of cash and other assets as restricted support if they are received with donor stipulations that limit the use of the donated assets. When the donor restriction expires, that is, when a stipulated time or purpose restriction is accomplished, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the Statement of Activities and Changes in Net Assets as "NET ASSETS RELEASED FROM RESTRICTIONS."

Investments

All investment securities held by JSF are reported at estimated fair value, which represents their fair market value. Realized and unrealized gains and losses are included in revenue. Time deposits are classified as "Held-to-Maturity" and are reported at cost.

Contributions

Contributions by Japan are included in the financial statements from the date indicated by Japan that funds are expected to be made available. Contributions which are restricted by the donor for specific TA projects/programs or for IPA grants are classified as temporarily restricted contributions. Those without any stipulation as to specific use are accounted for and reported as unrestricted contributions.

Technical Assistance

Technical assistance is recognized in the financial statements when the related project is approved and becomes effective. Upon completion of the TA project or cancellation of a grant, any undisbursed amount is written back as a reduction in TA for the year and the corresponding undisbursed commitment is eliminated, accordingly.

Functional Currency and Reporting Currency

The United States dollar is considered the functional currency as it has become the currency of the primary economic operating environment of the Fund. The reporting currency is the United States dollar. The financial statements are expressed in thousands of current United States dollars.

Translation of Currencies

Assets, liabilities, and uncommitted balances are translated to the reporting currency at the applicable rates of exchange at the end of a reporting period. Contributions included in the financial statements during the year are translated at the applicable exchange rates as of the respective dates of commitment. Revenue and expense amounts are translated for each semimonthly period at the applicable rates of exchange at the beginning of each period; such practice approximates the application of average rates in effect during the period. Exchange

ASIAN DEVELOPMENT BANK—JAPAN SPECIAL FUND

NOTES TO FINANCIAL STATEMENTS

31 December 2004 and 2003

gains or losses on currency transactions arise on exchange differences between the date a project/program is committed and the timing of disbursements. Exchange gains or losses are credited or charged to operations.

Equity Investments

Equity investments with readily determinable fair values are reported at fair value using quoted market prices.

Accounting Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires Management to make estimates and assumptions that affect the reported amounts of assets and liabilities as at the end of the year and the reported amounts of income and expenses during the year. The actual results could differ from those estimates.

Statement of Cash Flows

For the purposes of the statement of cash flows, the JSF considers that its cash and cash equivalents are limited to "DUE FROM BANKS."

NOTE C—INVESTMENTS

The main investment management objective is to maintain security and liquidity. Subject to these parameters, ADB seeks the highest possible return on its investments. Investments are governed by the Investment Authority approved by the Board of Directors in 1999. ADB is restricted by its Investment Authority to invest in government and government-related debt instruments and in time deposits. In the US dollar portfolio only and up to limited amounts, investments may be made in corporate bonds rated A or better, AAA-rated asset-backed securities, and AAA-rated mortgage-backed securities.

The investment portfolios of both JSF and ACCSF as of 31 December 2004 and 2003 are comprised of United States dollars holdings. Included in other securities as of 31 December 2004 were all corporate bonds.

The annualized rates of return on the average investments held under ACCSF and JSF funds during the year, based on the portfolio held at the beginning and end of each month were 1.35% and 1.47%, respectively (1.45% and 1.30%, respectively - 2003).

NOTE D—EQUITY INVESTMENTS

ADB used JSF resources to make an equity investment in India in 1990. In 2004, JSF sold this equity investment and realized a net gain of \$900,000.

NOTE E—OTHER ASSETS AND LIABILITIES

Included in other assets and liabilities are advances made for TAs totaling \$2,042,000 (\$2,398,000 - 2003) and interfund transfers as follows:

	<u>2004</u>	<u>2003</u>
Amounts Receivable by JSF from:		
ACCSF	\$604,000	\$1,410,000
Technical Assistance Special Fund	<u>1,000</u>	<u>-</u>
Total	<u>\$605,000</u>	<u>\$1,410,000</u>
Amounts Payable by:		
JSF to:		
Ordinary Capital Resources	\$ 50,000	\$ 141,000
Agency Trust Funds	<u>-</u>	<u>8,000</u>
Total	<u>50,000</u>	<u>149,000</u>
ACCSF to:		
Japan Special Fund	<u>604,000</u>	<u>1,410,000</u>
Total	<u>\$654,000</u>	<u>\$1,559,000</u>

NOTE F—UNDISBURSED COMMITMENTS

Undisbursed commitments are denominated in United States dollars and represent TA projects/programs which have become effective but not yet disbursed. During 2004, an amount of \$8,428,000 representing completed and partially canceled TA projects (\$7,891,000 - 2003) have been written back as a reduction in technical assistance for the year, and the corresponding undisbursed commitments have been eliminated. The fair value of undisbursed commitments approximates the amounts outstanding because ADB expects that disbursements will substantially be made for all the projects/programs covered by the commitments.

NOTE G—CONTRIBUTIONS AND UNCOMMITTED BALANCES

All contributions for the years ended 31 December 2004 and 2003 were received during the respective years.

Effective 31 December 2002, all remaining temporarily restricted net assets under JSF were transferred and integrated into the unrestricted regular net assets, as concurred by Japan, in order to optimize the use of JSF. Similarly, Japan lifted the restriction over the use of net accumulated investment income, which under the original terms of agreement between ADB and Japan, may only be used for defraying JSF's administrative expenses. Japan agreed to use the net accumulated investment income as additional resources for funding future ADB's TA operations.

In June 2004, the Cooperation Fund for Regional Trade and Financial Security Initiative was established as a multi-

donor umbrella facility to support TA to developing member countries for enhancing port security and combating money laundering and terrorist financing. In July 2004, the Government of Japan agreed to transfer US\$1,000,000 to the fund from the investment income of JSF.

Uncommitted balances comprised of amounts which have not been committed by ADB as at 31 December 2004. These balances include TA projects/programs that had been approved but not yet become effective.

As of 31 December 2004 and 2003 these balances are as follows:

	2004			2003		
	ACCSF	JSF Regular and Supplementary		ACCSF	JSF Regular and Supplementary	
		Total	Total		Total	
Uncommitted balances	\$26,022,000	\$149,229,000	\$175,251,000	\$25,067,000	\$140,208,000	\$165,275,000
TA projects/programs approved by Japan and ADB but not yet effective	–	(27,422,000)	(27,422,000)	–	(13,830,000)	(13,830,000)
TA projects/programs approved by Japan and not yet effective	–	(3,575,000)	(3,575,000)	–	(1,300,000)	(1,300,000)
Uncommitted balances available for new commitments	<u>\$26,022,000</u>	<u>\$118,232,000</u>	<u>\$144,254,000</u>	<u>\$25,067,000</u>	<u>\$125,078,000</u>	<u>\$150,145,000</u>

The temporarily restricted uncommitted balance remaining available as of 31 December 2004 corresponds to funds under ACCSF of \$26,022,000 (\$25,067,000 - 2003) to cover completion of TA disbursements and the amount of net accumulated investment income of \$2,865,000 (\$2,402,000 - 2003) for settlement of all administrative expenses.

Net assets released from restrictions relate to commitments for technical assistance satisfying the conditions specified by the donor and, in the case of accumulated investment income, to defray the administrative expenses of the Fund.

NOTE H—FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value of a financial instrument is defined as the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The carrying amount of time deposits is a reasonable estimate of fair value and thus unrealized loss was not incurred as of 31 December 2004.

If available, quoted market values are used to determine fair values. Financial instruments for which market quotations are not readily available are valued using methodologies and assumptions which necessarily require the use of subjective judgments. Accordingly, the actual value at which such financial instruments could be exchanged in a current transaction or whether they are actually exchangeable is not determinable.

The carrying amounts of JSF's assets, liabilities, and uncommitted balances are considered to approximate fair values for all significant financial instruments. See Notes B, C, D, and F for discussions relating to investments, equity investments, and undisbursed commitments.
